

Computers & Applied Sciences Complete (CASC) is a product of EBSCO Publishing. This database covers the research and development spectrum of the computing and applied sciences disciplines. It contains collected knowledge on traditional engineering challenges & research, and is a resource for research concerning the business and social implications of new technology. CASC provides indexing and abstracts for nearly 2,200 academic journals, professional publications, and other reference sources from a diverse collection. Full text is also available for more than 1,000 periodicals. Subject areas include the many engineering disciplines, computer theory & systems, new technologies, and social & professional context.
