

Author: Rob Flickenger, Corinna "Elektra" Aichele, Carlo Fonda, Jim Forster, Ian Howard, Tomas Krag and Marco Zennaro

ISBN: 1-4116-7837-0

This book focuses on wireless data networking technologies in the 802.11 family. The hope is that this book will not only convince readers that this is possible, but also show how such networks actually made to work, and to give the readers the information and tools they need to start a network project in their local community.
