

Internet & Personal Computing Abstracts™ (formerly Microcomputer Abstracts) provides abstracts and indexing for literature related to personal computing products and developments in business, the Internet, the home, and all other applied areas. This database contains content coverage that extends back to the 1980s. Over 400 of the most important trade publications, mainstream computer magazines, and professional journals are covered, including those that focus on specific topics such as Macintosh and Windows platforms, programming, web development and more. Special emphasis is also given to hardware and software reviews. The product includes content from such titles as Byte.com, PC World, Macworld, and Linux Journal. The product also includes editor-selected articles from hundreds of popular magazine titles.
